PROJECTS

Daily News

This project is like a news portal. They have user create and log in log out , gmail authentication formula. This project has a database where the news data is stored from the admin post Filter option provides specific news and tries to show what I know about those technologies.

Client code| server code

Simple cart app by redux

This simple cart project is a demo project. This project uses react, redux toolkit for state management and using redux thunk for fetching apis inside redux. I just try to show something that I have learned .
